# Introduction

1

Profonanpe, Peruvian Environmental Fund, is a private non-profit entity specialized in efficiently raising and managing financial resources for the implementation of programs and projects that contribute to biodiversity conservation and climate change mitigation and adaptation. Profonanpe manages collaborative projects that have a positive impact on the environment and people.

Considering that the impact of anthropogenic activities on the environment aggravates the global environmental and climate crisis, and that Profonanpe's institutional purpose is to promote the sustainability of life by connecting humanity with the environment, Profonanpe seeks to commit itself to reducing these impacts by developing its activities in a sustainable manner.

Therefore, the implementation of an internal institutional sustainability and eco-efficiency policy is considered necessary.

## 2

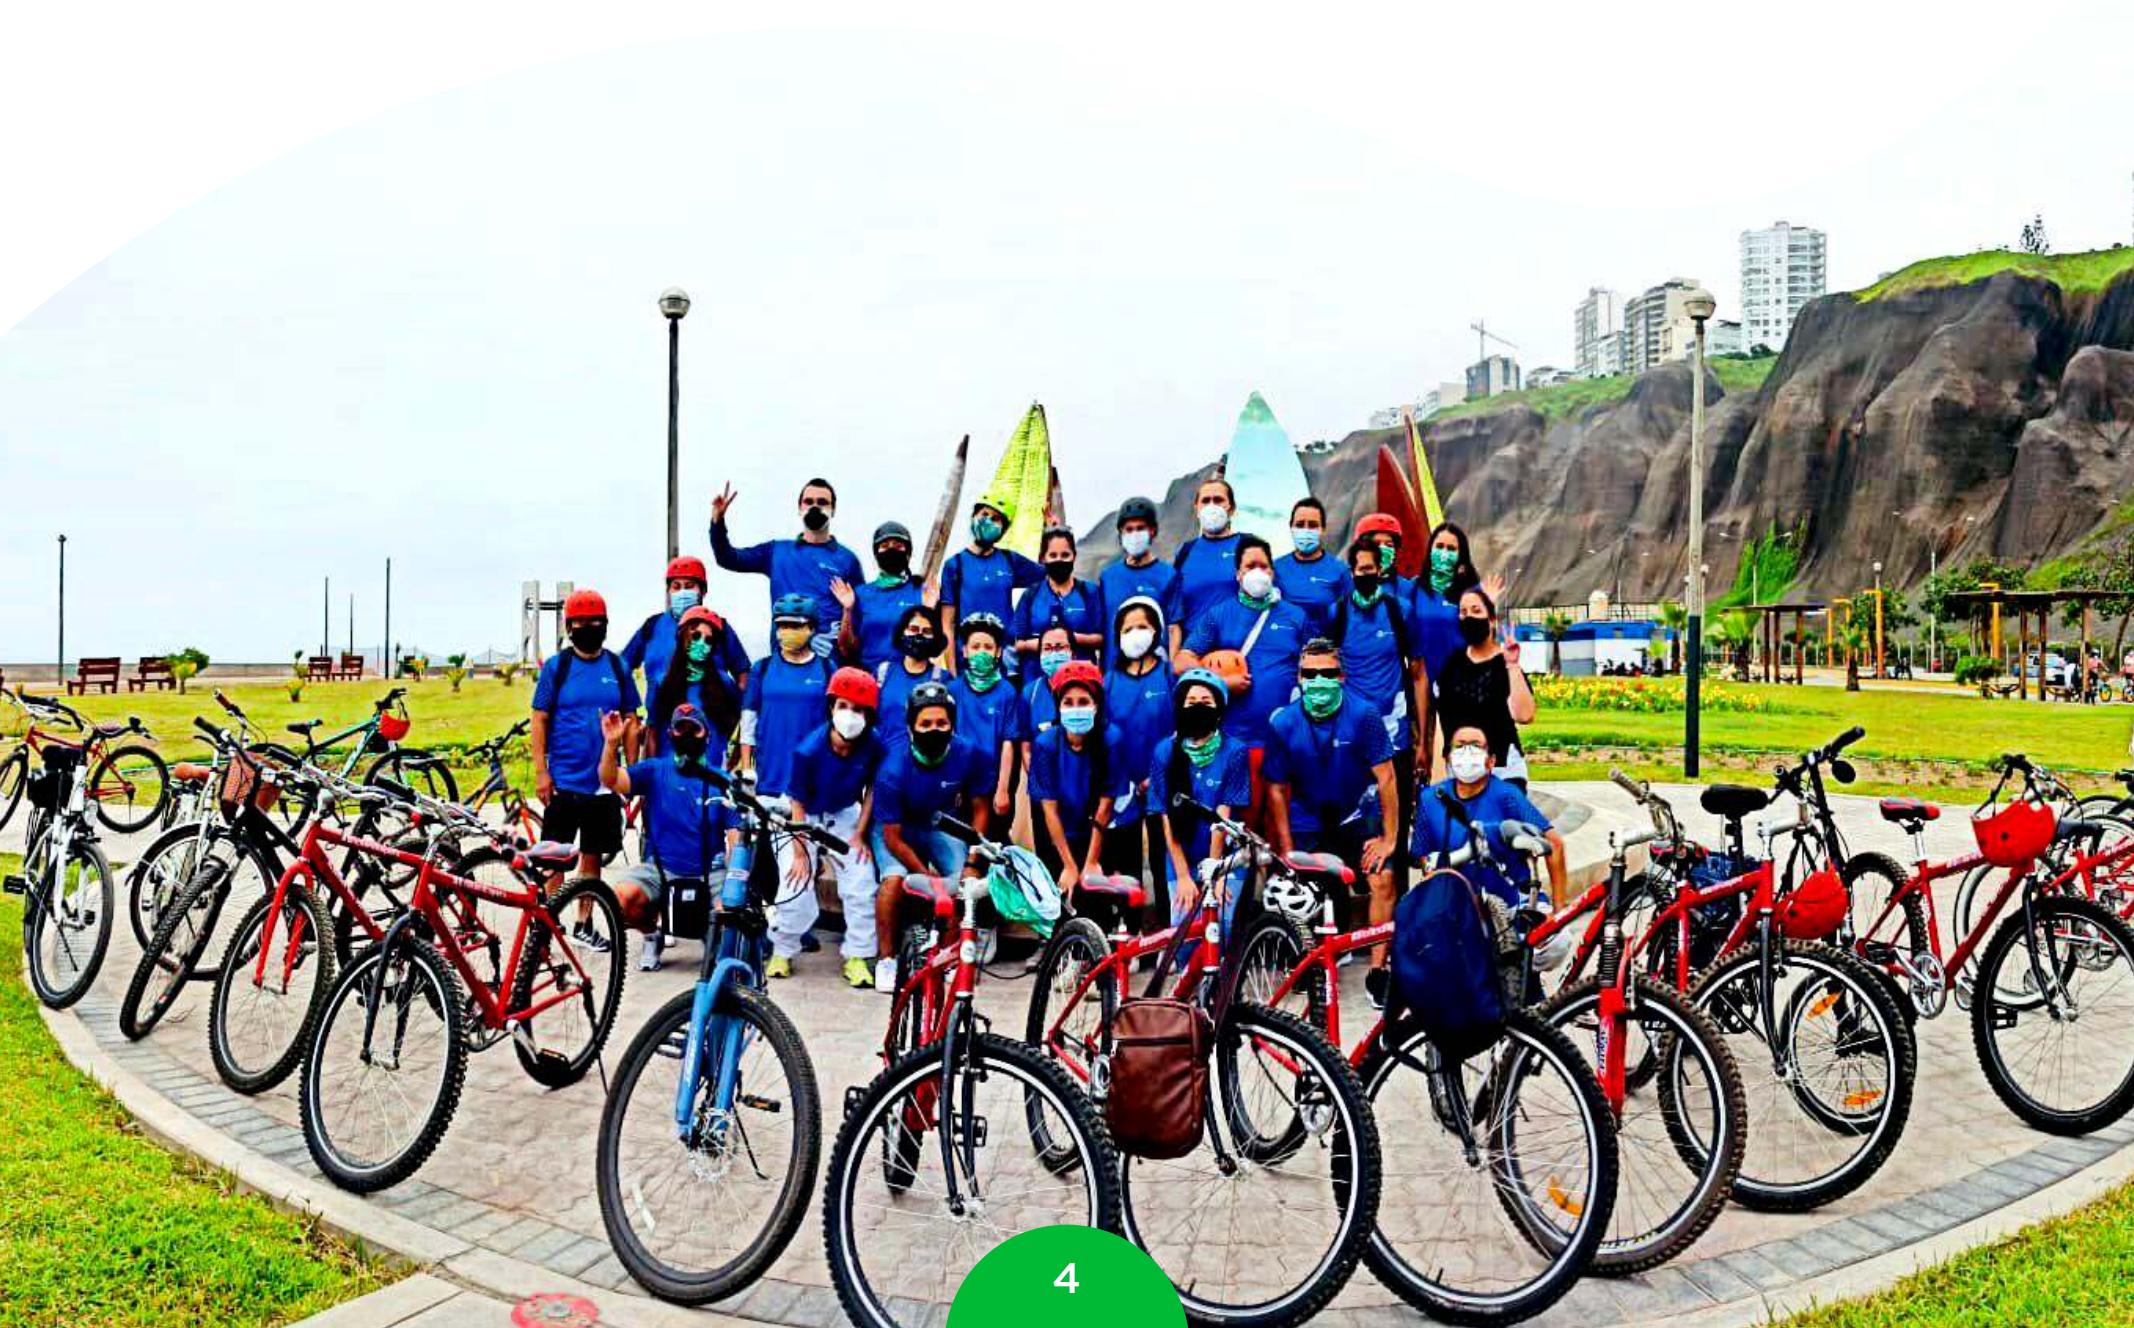

# Strategic Objectives

- **Strategic Objective 1:** Promote the development of good practices by Profonanpe's collaborators, to achieve sustainability and eco-efficiency of the institution, inside and outside the office.
- **Strategic Objective 2:** Promote sustainable actions to reduce Greenhouse Gas (GHG) emissions at Profonanpe's facilities.

## 3

# Scope of Application

This Policy is of internal and institutional application and its compliance requires the participation and commitment of all Profonanpe's collaborators.

## Guidelines

4

Profonanpe has established the following guidelines, which address the strategic objectives:

### 4.1. Individual and institutional activities

- Generate awareness and promote initiatives to reduce the carbon footprint of the institution's employees through training, talks and the development of individual commitments.
- Comply with national legislation on eco-efficiency.
- Measure and reduce carbon emissions in Profonanpe's operations aiming at carbon neutrality.
- Propose mechanisms for continuous improvement of institutional eco-efficiency performance.

### 4.2. Eco-efficiency

- Reduce energy used and practice energy efficiency in institutional operations.
- To comply with Profonanpe's GHG Reduction Plan.
- Report on the objectives, results and activities related to the institution's GHG emissions management, in an open and transparent manner with Profonanpe's collaborators, partners and the general public.

The actions involved in the guidelines respond to the strategic objectives.

5

## Relationship with other Profonanpe Policies

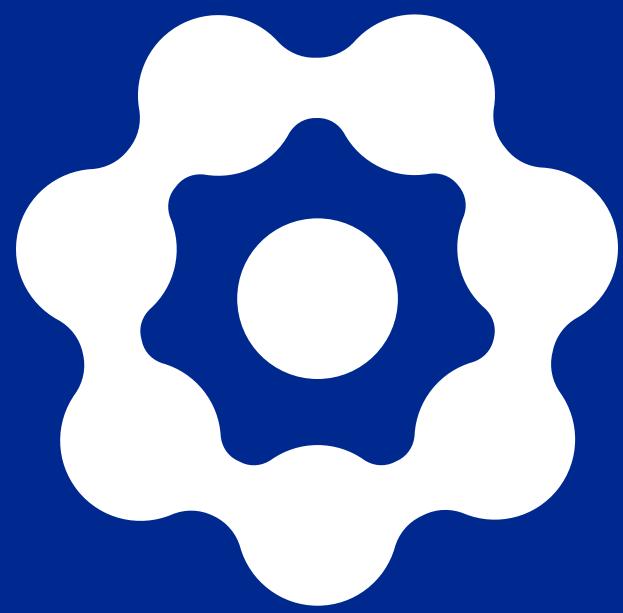

This policy is related to the Gender, Environmental and Social (ESP) Policy and the Code of Ethics, among other institutional policies.

3

The implementation of this policy is developed in Profonanpe's GHG Reduction Plan.

Under the leadership of Team Huella, the responsibility for the successful implementation of this policy belongs to every Profonanpe employee at every level and function in the organization.

As an institution, Profonanpe can achieve growth in a competitive and climate-responsible manner.
